

# JPORT Installation Instructions

1. Choose a mounting location on the dashboard that will allow enough room behind the dash to run the JPORT cables to the existing car radio.
2. Drill a 3/4" hole in the dashboard.
3. Remove the hexagonal nut from the JPORT.
4. Insert the RCA cable ends through the hole in the dashboard from the front.
5. Replace hexagonal nut on the back side of the dashboard and secure the JPORT to the dashboard.
6. Plug the RCA cables into the RCA-IN jacks on your existing car radio.
7. Plug a device with a 3.5 mm jack into the JPORT to test the connections.
8. Replace the dashboard components.
